

All Weather Wicker And Aluminum Frame Outdoor Furniture

Exceptional, Hand-Crafted Casual Furniture

FRAMES: Our distinctive patio furniture features heavy gauge aluminum alloy extrusions with uniquely supported inner walls. The frame will remain rust free for the life of your furniture. We create the finest combination of strength and durability by using heliarc hand welds, hand ground where applicable, to ensure strong construction for our distinctive designs.

FINISH: Every frame is prepared using a multistage powdercoat process. The frames are inspected before entering the pretreatment center where the surfaces are chemically cleaned and prepared. Frames are then covered in a specially formulated powdercoat finish in a variety of colors and textures. The bonding and curing process follows in a specially constructed treatment center.

STRAPS/WICKER: We use only 100% virgin vinyl, the ultimate outdoor material for style, support, and comfort. The vinyl straps are specifically formulated to retain their shape and resist severe climatic conditions for many years. Each strap is double wrapped around the frame and secured in place. All Weather Wicker is made of durable PVC vinyl and hand woven in time-honored traditional methods. Ultraviolet stabilizers are added to resist the sun's radiation.

CUSHIONS: A high grade of 100% polyester is wrapped around a layer of polyurethane foam. The polyester fills the cushion, ensuring deep comfort, and the foam helps maintain the shape and fullness. Top quality fabrics are specially designed, woven, printed and treated to resist staining and wear. UV stabilizers help resist the sun's radiation.

SLINGS: The fabric on our sling style furniture is made from the strongest material developed for outdoor furniture. The yarns are produced by extruding PVC over a core of polyester fibers, a process originally developed to make auto tires. The yarns are then heat-sealed to retain their shape for years. Finally, the fabric is stretched between dual sling rails that beautifully frame the fabric.

CAST ALUMINUM TABLETOPS: Our cast aluminum tabletops are constructed with the same precision and finely detailed welding as our furniture frames.

GLASS TABLETOPS: Our glass tabletops are made of tempered glass. Tempered glass is five times stronger than ordinary glass. It offers the ease of cleaning and the assurance of durability in any environment.

STONE TABLETOPS: Our hand laid natural stone tabletops are made from marble and exotic fossil stone. Naturally porous, it has been specially sealed to resist moisture penetration. Proper maintenance will ensure its strength and beauty for years.

Care & Maintenance

Making the Beauty Last

GENERAL CARE AND MAINTENANCE: Never use cleansers, abrasive cleaners or bleach products to clean any portion of your furniture, including frames, glass and seating material. Clean and dry thoroughly before storing for the winter. Always drain any water that has accumulated inside the frames—especially before storing for the winter. Protect your furniture with commercially available outdoor furniture covers when not in use. If your furniture is being used in areas of intense sun exposure or hot temperatures, heavy pollution, or where birds and trees are plentiful, covering your furniture is especially recommended.

FRAMES: Clean your frames periodically with mild soap and warm water. Rinse with clean water and dry thoroughly. Be sure to drain any water accumulated inside frames. Do not use wax on textured frames.

STRAPS/WICKER: Clean frequently with mild soap and warm water. Rinse with clean water and dry thoroughly. In areas with heavy pollution or smog, use commercially available vinyl cleaners. Occasional application of a commercially available vinyl protector will enhance the look, strengthen, and prolong the life of the straps or wicker weave.

CUSHIONS AND SLINGS: Wipe up minor spills immediately and spot clean with mild soap and a damp cloth. Although fabric has been treated to resist stains, periodic use of commercially available fabric cleaners may be necessary. Follow manufacturer's instructions. The best way to maintain the beauty of cushions or slings is to store them out of the elements or cover them when not in use.

Suntan oils, lotions or other chemicals, or repeated exposure to extreme weather conditions (including heat) may cause permanent discoloration to any vinyl straps, wicker or fabric (including sling). Exercise caution when using lotions or oils. If exposed to oils or lotions, immediately spot clean the area. For cushions and slings, avoid contact with or exposure to pool chemicals, including chlorinated water.

GLASS TABLETOPS: Clean with mild soap and warm water or commercially available glass cleaners applied with paper towels.

STONE TABLETOPS: To ensure the lasting beauty of your stone tabletop, please refer to the special stone care label that is attached to the underside of your stone tabletop. Detailed care and maintenance instructions are also available by visiting our website at www.agio-usa.com/stonecare/index.htm or by calling our Customer Service Center at 800-416-3511.

NON-GLASS TABLETOPS: Clean with mild soap and warm water. Rinse with clean water and dry thoroughly.

When using an umbrella with the table, always use a sturdy, heavy umbrella base. Make sure the umbrella protector ring is secure inside the center hole of the table. Always remove umbrella from table when not in use. Never use umbrella in windy conditions.

(Some of the information herein may not be applicable if this set does not feature cushions, slings, straps, glass or stone in the designed construction.)
