

## SDS-max® R-Tec

### The R-Tec Advantage

Bosch R-Tec technology for SDS-max® chisels use an energy diverting reflection element that increases material removal by 15%. Because the energy is dispersed back into the work material, the tool and bit do more of the work with less vibration for the user. And the R-Tec chisel features a unique cutting head with extra wedges for increased breakout. Bosch SDS-max® R-Tec chisels and points produce faster results in less time and help increase overall jobsite productivity and profitability.

# 15%

## Higher Removal Rate vs. Standard Chisel
