iPort

connecting technology and life.

Products for Technology Integrators

LAUNCHPORT®

Hold. Charge. Protect.

LaunchPort is the world's first inductive charging and magnetic mounting system for iPad® and iPad mini. By utilizing a method of charging and mounting that requires no mechanical fasteners or wires, LaunchPort creates exciting new ways to use an iPad while it is charging. The result is an experience that allows a user to effortlessly mount and dis-mount their iPad in more environments and applications.

The LaunchPort system contains 2 components: a Sleeve and a Station. The Sleeve is a form-fitting case that protects iPad and provides an interface to connect to a Station. There are 2 types of stations: a tabletop BaseStation or WallStation which can be integrated into a variety of solid surfaces. The LaunchPort system creates new possibilities in residential and commercial spaces including hospitality, retail, medical, transportation and institution. Use your iPad while it charges in more places than you ever thought possible with LaunchPort.

Sleeve

The Sleeve is a form-fitting case that wraps around your iPad and keeps it safe. On the back, the circle aligns your iPad-in-Sleeve to either a WallStation or BaseStation. The magnets inside the Sleeve create just the right holding force: Strong and sturdy on the wall or easy to grab and go on the table. Choose between a soft touch black or a high gloss white finish.

FEATURES

- Made for iPad certified
- Built in wave-guide redirects iPad speaker audio back at you
- Ergonomically designed
- Contains embedded magnets for secure mounting to wall or any metallic surface

all buttons and cameras accessible

* iPad not included

WallStation

The WallStation provides a home for your iPad on a wall. It securely mounts and charges your iPad while in a Sleeve. Rotate your iPad through 360 degrees and use provided detents for alignment to portrait and landscape orientations. With its discreet matte white finish and small footprint, the WallStation minimizes visual impact on the wall when not in use. Use a WallStation in a residential or commercial space, turning a wall into an information center, gallery, video conferencing station, or anything else you can imagine.

BaseStation
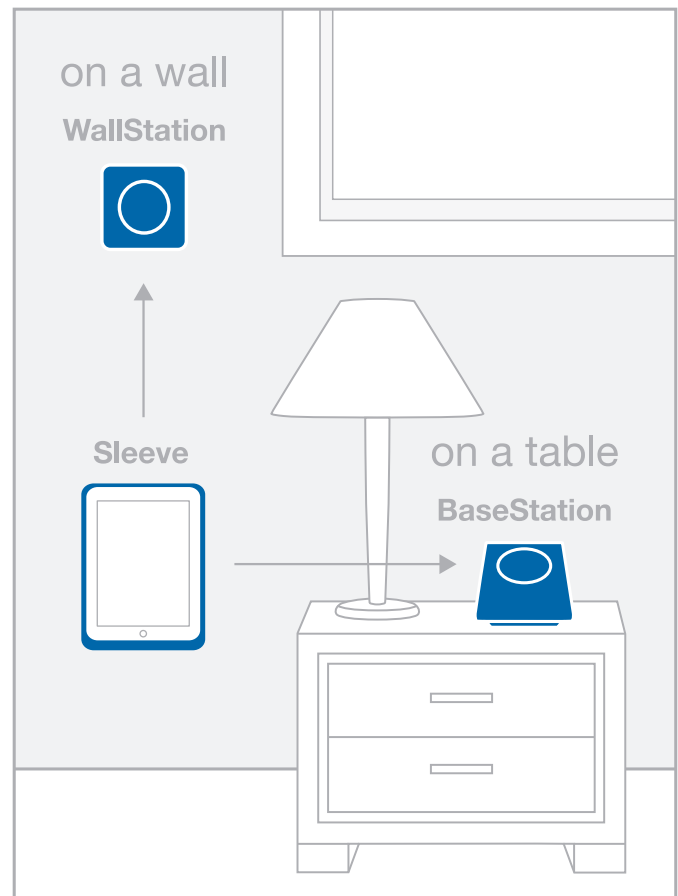

BaseStation

The BaseStation allows you to mount your iPad on a tabletop, at the ideal angle for typing and tapping. Rotate your iPad through 360 degrees while mounted and charging and use provided detents for alignment to portrait and landscape orientations. Silver aluminum and black gloss finishes make the BaseStation right at home with all of your Apple products.

• Made for iPad mini and iPad mini with Retina display

• Built in wave-guide redirects iPad speaker audio back at you

• Ergonomically designed

• Contains embedded magnets for secure mounting to wall or
 any metallic surface

MSRP - $139, **SKU** - #70304 (black)
MSRP - $139, **SKU** - #70305 (white)

The iPort Control Mount Series provides an elegant way to integrate an Apple iOS device (iPad, iPad mini, and iPod touch) into a solid surface or wall. Ideal for home automation or digital signage, the Control Mount system uses Sonance speaker mounting technology to mount the iOS Device near-flush to the wall. The Control Mount Power System allows integrators to power the iOS device from nearly 200 ft away from the mounting location. With the paintable bezel, the mounting system can become nearly invisible on the wall. And don't worry about use in a public space: built into every Control Mount is an optional security lanyard. Control Mount: the world's most elegant in-wall mount.

Control Mount Air

• Compatible with iPad Air

• All new ultra-thin aesthetic

• Allows wi-fi connection of the mounted iPad Air for downloads of apps, audio content and certain upgrades

• Connects to compatible control systems via wi-fi for operating home automation systems

• Securely supports the iPad Air and provides a modern, elegant appearance

• Charges the iPad Air while it is mounted

MSRP - $399, **SKU** - #70095

Control Mount Mini

• Compatible with iPad mini

• All new ultra-thin aesthetic

• Allows wi-fi connection of the mounted iPad mini for downloads of apps, audio content and certain upgrades

• Connects to compatible control systems via wi-fi for operating home automation systems

• Securely supports the iPad mini and provides a modern, elegant appearance

• Charges the iPad mini while it is mounted

MSRP - $329, **SKU** - #70094

CM-IW2000 V2

• Compatible with iPad (4th generation), iPad (3rd generation), iPad 2 and iPad

• Allows wi-fi connection of the mounted iPad for downloads of apps, audio content and certain upgrades

• Connects to compatible control systems via wi-fi for operating home automation systems

• Securely supports the iPad and provides a modern, elegant appearance

• Charges the iPad while it is mounted

MSRP - $399, **SKU** - #70093
