

BANG & OLUFSEN

BeoSound Essence

Upgrade your music streaming experience.

An iconic one-touch music system

Enjoy the incredible wealth of digital music available today without compromising on audio quality.

BeoSound Essence is a simple, elegant one-touch music system and an integrated component in the wireless Bang & Olufsen BeoLink Multiroom experience. It gives direct access to some of the world's most popular music services and thousands of global internet radio stations. With just four buttons, it frees you from the complexity of modern life and lets you just enjoy music. Use it as a remote or place it on the wall and it will work like a light switch for music. Simple, intuitive and unique.

Complete the experience

While the design is created with simplicity in mind, the accompanying complimentary BeoMusic App for iPhone, iPad or Android smartphones brings an entirely new dimension to the experience.

BeoMusic App lets you pick and choose between your favourite tracks from your own digital music collection, while a wealth of internet radio stations are yours to enjoy too, provided by TuneIn, integrated in BeoSound Essence. You can also access millions of tracks through built-in Deezer, Spotify Connect and QPlay*.

When you find what you are looking for, simply switch the music with a single touch, regardless of its source. BeoSound Essence streams wirelessly via AirPlay, DLNA and Bluetooth.

Ready for wireless BeoLink Multiroom sound

If you are looking to design a wireless setup around BeoSound Essence, you have the opportunity to combine it with a range of our most popular products to enjoy the convenience, freedom and flexibility of wireless sound, throughout your home. Add a BeoPlay A9 sound system to take sound with you from room to room, or a BeoVision Avant to integrate a TV in the experience. BeoLink Multiroom technology is integrated and ready.

Red Dot Winner

At the 2014 Red Dot Awards, BeoSound Essence was awarded a prestigious Red Dot for excellence in product design. We are incredibly proud of this honour, which we consider a significant acknowledgement of our ability to deliver high quality music experiences – both in terms of usability and design.

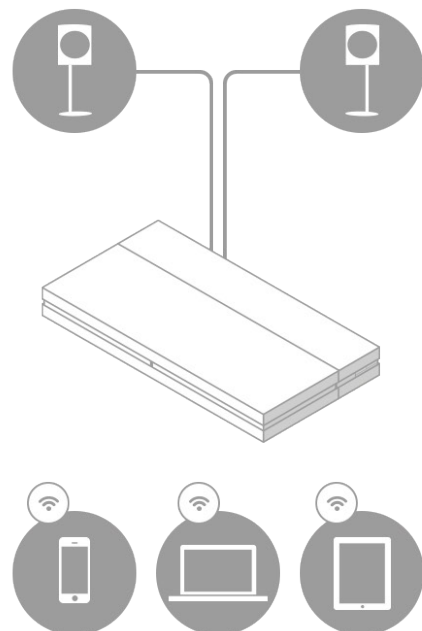

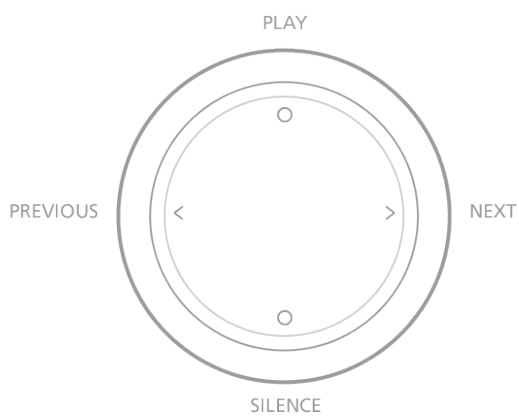

*QPlay is only available in China.

BeoSound Essence setup:

A BeoSound Essence setup consists of a hideaway box and an optional wall or table stand remote. Add any Bang & Olufsen active speakers, wired or wireless*, to start listening.

*Connection from BeoSound Essence hideaway box to wireless active Bang & Olufsen speakers with WiSA requires a BeoLab 1 Transmitter.

The BeoSound Essence Remote mounted on the wall.

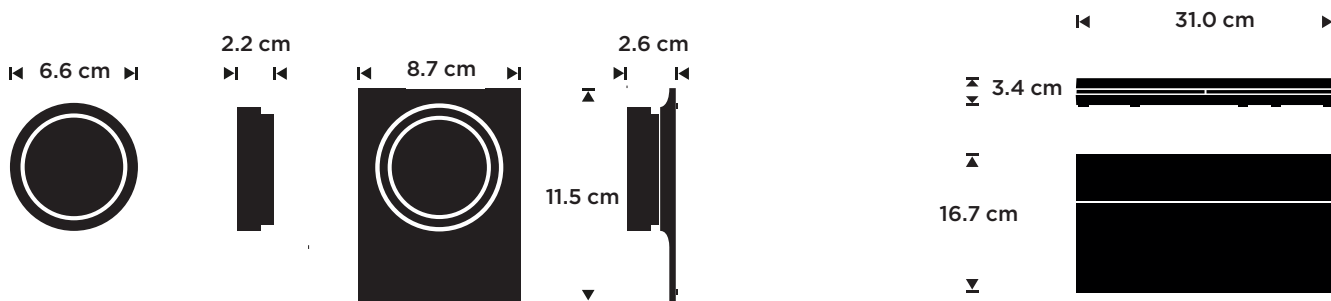

The table stand variant of the BeoSound Essence Remote.

You can easily place the hideaway box anywhere near the speakers.
