BlackBerry 7100g

for the Enterprise

Phone, Email and Data – All in One

The BlackBerry® 7100g business phone provides the best combined wireless email and data experience for enterprise users who prefer a smaller handset design. It puts top-of-the-line features, such as speakerphone, Bluetooth® technology, polyphonic ringtones and an advanced call log, in a sleek and stylish handset. The BlackBerry 7100g™ offers complete BlackBerry functionality including phone, email, enterprise data, Internet, SMS and organizer applications.*

Enterprise Friendly

For enterprise and government organizations, the BlackBerry 7100g works with BlackBerry Enterprise Server™ to provide users and IT managers with:

- Advanced security features
- Wireless "push" delivery of email and data
- Secure access to intranet and Internet based applications
- Single mailbox integration
- Attachment viewing

- Wireless email reconciliation
- Wireless calendar synchronization
- Remote address book look-up
- Centralized management and support
- And more

Unlike traditional mobile phones, the BlackBerry 7100g business phone can be centrally managed and supported by IT departments using BlackBerry Enterprise Server. Also, the BlackBerry 7100g incorporates advanced security features to satisfy strict IT requirements.

Easy-To-Use

The BlackBerry 7100g features BlackBerry "push" technology that enables email and information to be delivered automatically and effortlessly. Messages can be quickly composed on the BlackBerry 7100g thanks to the integrated SureType™ keyboard technology. SureType allows users to quickly and accurately dial or type using either one-handed operation or two-handed thumb-typing without the limitations of traditional phone keypads. The BlackBerry 7100g also incorporates a large, vibrant, high-resolution color LCD display, easy-to-use navigation trackwheel and intuitive menu interface to optimize the mobile experience.

More Powerful Than Traditional Mobile Phones

The BlackBerry 7100g business phone stands apart from traditional mobile phones by providing superior features, such as enhanced messaging and data capabilities, Bluetooth technology, speakerphone, ample memory, quad-band network support, an advanced call log, embedded wireless modem and an internal high performance antenna.

Imagine the Freedom

- Make calls in your car using convenient Bluetooth hands-free technology
- Access intranet information while in a client meeting
- Receive wireless notifications and alerts from business reporting systems
- Wirelessly access service histories and product bulletins
- Send and receive messages while waiting in an airport
- Initiate a spontaneous conference call using the built-in speakerphone
- Set up a meeting from the middle of a tradeshow

::: BlackBerry™

SureType Keyboard Technology

SureType is an innovative keyboard technology that supports the advanced messaging features that serious users require. Through an integrated keyboard and software system, SureType effectively combines a traditional phone keypad and a familiar QWERTY keyboard with intuitive software to create an efficient and familiar dialing and typing experience. With SureType, there are no dual keypads, peripherals or hardware transformations required, and there is no need to learn a new way to type.
