

# 3•2•1 GSX

DVD HOME ENTERTAINMENT SYSTEM

**PRODUCT POSITION:**

For customers who love music and movies but would prefer the simplicity of fewer speakers and wires. The 3•2•1 GSX system is our premium selection in the 3•2•1 system family, which offers the benefit of music storage. It delivers much of the performance of a five-speaker home theater solution, with an intelligent approach to music.

**PRODUCT BACKGROUND:**

In 2001, the 3•2•1 system created a new paradigm for home theater by providing a solution with fewer speaker and wires. In 2004, the 3•2•1 system concept was updated in our Series II products to deliver enhanced performance, greater ease of use, and a sleek, more elegant media center. The new 3•2•1 GSX system leverages the Series II platform and incorporates CD content storage capabilities and the benefits of our proprietary uMusic™ intelligent playback system.

FEATURE	FUNCTION	BENEFIT
Integrated music storage system.	Digitally stores and organizes up to 200 hours of music within the elegant 3•2•1 system media center.	Enables your music CDs to be digitally stored and organized inside the elegant media center and be accessible at the touch of a button. Eliminates the clutter of CD stacks and the frustration of searching for CDs.
uMusic™ intelligent playback system.	The uMusic playback system applies insights gained from monitoring your music listening habits, along with detailed information about your music collection, to create a personalized music database.	<p>A simpler and better way of enjoying more of your music.</p> <p>Music is easy to access - no need to manually organize stacks of CDs. No menus.</p> <p>No need to create playlists. No computer required.</p>

## DVD HOME ENTERTAINMENT SYSTEM

FEATURE	FUNCTION	BENEFIT
Gemstone® speaker arrays.	Each speaker array has a ported enclosure with two precisely oriented transducers. The two speaker arrays are designed to work in concert with our TrueSpace™ surround digital processing circuitry.	Features speaker arrays, which are 50% smaller than our current 3•2•1 speaker arrays and can blend into almost any décor.
Neodymium iron boron magnet (in the Gemstone® speaker arrays).	The magnet provides ten times the energy density of conventional magnetic material in a magnet the size of a quarter.	Provides the powerful magnetic field required to deliver a high level of performance from a remarkably small speaker.
Integrated systems design.	All elements (media center, speakers, Acoustimass® module) are specifically designed to work in harmony with each other.	Delivers simplicity and performance unmatched by many conventional component systems, home-theater-in-a-box systems or one-brand shelf systems.
TrueSpace™ surround digital processing circuitry - combined with Gemstone® speaker arrays.	Digital 5.1 decoding and Bose Videostage® 5 decoding circuitry works with the TrueSpace™ circuitry and speaker arrays to deliver a multi-channel sound experience from just two visible speakers.	Delivers a broad, spacious soundstage, home theater experience and strong center imaging - from just two speaker arrays.
Digital 5.1 decoding.	Five discrete channels of audio are delivered from Digital 5.1-encoded material, including (DVD, Dolby® Digital, DTS®, DSS, HDTV,) along with the added lower note impact of the “.1” low-frequency effects channel.	Provides improved realism from 5.1- encoded DVDs, DSS or HDTV, and delivers a home theater experience with much of the acoustic benefits of a full five-speaker system.
Integrated DVD player with progressive scan technology.	Provides access to the most popular content including: DVD video, CD, CD-R, CD-RW, VCD, Digital 5.1, and MP3 flat files on CD.	Integrated A/V solution provides playback of today's most popular audio and video content.
Simplified wiring.	To make wiring and setup easier, the system features: <ul style="list-style-type: none"> <li>• Single power supply and transformer inside Acoustimass® module.</li> <li>• Simplified one-way connectors.</li> <li>• All the amplification for the system is housed in the hideaway Acoustimass module.</li> </ul>	Enables customers to make only four simple connections to get high quality audio: <ol style="list-style-type: none"> <li>1. Acoustimass module to media center.</li> <li>2. Acoustimass module to speakers.</li> <li>3. Media center to TV.</li> <li>4. Acoustimass module to power outlet.</li> </ol>
Universal IR remote control.	Infrared beam is used to provide access to the system functions.	Delivers seamless 3•2•1 system operation with additional video components. One easy-to-use remote controls all functions of the 3•2•1 system, including the uMusic system feature. The remote also provides access to most attached devices.
Bose Videostage® 5 decoding and post-processing circuitry.	Designed specifically for home use, it automatically generates and processes as many as six independent channels of audio from non-5.1 sources.	Features proprietary technology that automatically delivers much of the home theater experience of full five-speaker surround from the sources people enjoy today: surround-encoded VHS tapes, stereo CDs and even mono TV programs.

FEATURE	FUNCTION	BENEFIT
Automatic tonal adjustment.	The system automatically delivers proper equalization to optimize music or movie listening.	Makes movies sound impactful and music sound natural.
Active electronic equalization.	The output of all frequencies is balanced to provide natural tonal balance and clarity throughout the audio spectrum.	Provides natural tonal balance and clarity throughout the audio spectrum.
Digital Dynamic Range® speaker compression circuitry.	Proprietary circuit design compresses dynamic range of video program audio as a function of volume.	Enables soft sounds to be heard (particularly dialogue) even at low listening levels, and still delivers the impact of loud special effects.
Acoustimass® speaker technology.	Patented design launches sound into the room on an air mass, rather than from a vibrating speaker cone.	Delivers pure, deep low notes without audible distortion, enabling the Acoustimass module to be hidden almost anywhere in the listening area.  Allows for small speaker arrays while maintaining a high level of performance.
Bose® link.	Allows seamless hookup to a Lifestyle® system for sound enjoyment in another room.	Enables home-wide entertainment.  Allows Lifestyle® systems to integrate with other Bose products and provide sound and basic control functions in secondary rooms.

### SPECIFICATIONS

Limited Warranty:	One-year transferable limited warranty stays with the system even if purchaser passes ownership to another person.
Dimensions/weight:	Media Center: 3 $\frac{1}{2}$ " H x 13 $\frac{3}{4}$ " W x 9 $\frac{9}{16}$ " D (8.02 cm x 34.93 cm X 25.27 cm) - 6.85 lbs (3.11 kg) Speaker arrays: 2 $\frac{1}{2}$ " H x 5 $\frac{1}{2}$ " W x 4 $\frac{1}{8}$ " D (6.4 cm x 14.15 cm x 10.52 cm) - .97 lbs/array (438 g) Magnetically shielded. Acoustimass® module: 14 $\frac{1}{2}$ " H x 8 $\frac{3}{8}$ " W x 19 $\frac{1}{8}$ " D (36.7 cm x 22.2 cm x 48.5 cm) - 23.3 lbs (10.6 kg) System (in carton): 23 $\frac{1}{3}$ " H x 17 $\frac{1}{2}$ " W x 18 $\frac{1}{2}$ " D (59.21 cm x 44.3 cm x 47.14 cm) - 44 lbs (20 kg)
Optional accessories:	Floor stands: UFS-20B (Black), UFS-20S (Silver) Table stands: UTS-20B (Black), UTS-20S (Silver) Wall brackets: UB-20B (Black), UB-20S (Silver)
Finish:	Full package (media center, remote, speakers and Acoustimass module): Speaker arrays available in Graphite Gray and Silver.
