The BlackVue DR750S-2CH IR is designed for taxi and Uber/Lyft drivers looking to get the best overall protection for themselves and their vehicle. The front camera equipped with a Sony STARVIS Full HD sensor monitors the road at 60 frames per second. The interior camera secures the inside of the vehicle day and night thanks to its infrared sensor and LED lights.

The IR camera is connected to the front camera via 1.5m (4.9ft) coaxial cable. The Interior IR camera **truly sees in the dark**, even pitch-black lighting conditions, thanks to its integrated infrared LED light that activates automatically based on the ambient light.

The DR750S-2CH IR is compatible with Parking Mode. In Parking Mode, your dashcam monitors your vehicle while you are away, recording videos when it detects movement or impact. You will need a Power Magic Pro or Power Magic Battery Pack to enable this feature.

Car Radio Versions

Any
