touch panel interfaces  SIMPLIFY YOUR LIFE
MVP PERFORMANCE. The 8.4” Modero ViewPoint (MVP-8400) complements any integrated commercial environment and seamlessly adapts to your business infrastructure. Take advantage of end user flexibility, peace of mind and a strong return on your investment. This feature-driven panel represents our most versatile control platform, allowing you to experience wireless control, accomplishing more with greater efficiency.

SMART BUSINESS. Configure and automate audio/video equipment in your office, boardroom, hotel/apartment and training areas—in a matter of seconds. The MVP-8400’s learning curve is virtually non-existent. With confidence, instantly access information on the network, contact global partners for a videoconference and manage facility operations. Accomplish more, so you can concentrate on important matters. That makes for smart business.

EXTREME VERSATILITY. The astounding versatility of the MVP-8400 enhances business productivity. Simply decide what works best for your needs. The MVP-8400 offers Table Top functionality, Wall/Flush Mount flexibility plus wireless mobility—all in one. With the wireless MVP, the control is always with you, wherever you want.

WIRELESS CONTROL. The MVP-8400 is ideal for wireless control. Communicating directly with AMX’s Wireless Access Point, the MVP-8400’s wireless signal remains clear, strong and secure. Its sleek design, lightweight dimensions and sharp display carry mass appeal, so you can take it anywhere you go with minimal effort.

TOUCH PANEL SECURITY. Not to worry. The MVP-8400’s Wall/Flush Mount Docking Station comes with an anti-theft integrated locking mechanism. No one can remove the panel without the proper authorization code necessary to release it from the wall unit. It will always be right where it should be, in the docking station ready for you to unlock and take control.

MVP VALUE. Take advantage of this amazing value without compromising any of the advanced touch panel features you have come to expect from AMX. The 7.5” Modero ViewPoint (MVP-7500) comes in the ideal size for seamless, powerful control capabilities within any commercial or residential integrated environment. The number of applications is virtually limitless, and the MVP-7500 gets you there at a smart price point.

BOTTOM LINE. Whether it’s your company’s bottom line or your own personal finances, sometimes it’s necessary to make the most economic purchase possible. The MVP-7500 makes your choice easier than you might expect, especially if you’re looking to integrate a large facility or home with multiple rooms. You’ll find nothing beats the MVP-7500’s overall value.

CHOICE CONTROL. The innovative and flexible design exclusive to the MVP series adapts effortlessly to your working style and lifestyle. The MVP-7500 allows you the option of Table Top, Wall/Flush Mount plus wireless mobility. Different situations – meetings at work and relaxing moments at home – call for different control features. Feel free to mix and match to determine what combination works best for you.

PEACE OF MIND. Touch panel security is always a top priority. It must remain safe, secure and available at all times. In response to possible theft, loss or damage, the MVP-7500 comes with a locking mechanism exclusive to the Wall/Flush Mount Docking Station. Only authorized users – instructors, technicians, homeowners – can access the panel. Navigate the MVP-7500, return it to the docking station, lock it in and relax.

**WIDER IS BETTER.** If you require the ultimate in user interface features, the 17” Modero Widescreen is for you. Nothing compares in size or power.

**GREAT EXPECTATIONS.** The 17” Modero Widescreen Touch Panel provides the greatest display capability on the market today. Table Top and Wall/Flush Mount versions are available, ready to deliver the most powerful control capabilities you’ll experience in commercial and residential applications.

**REVOLUTIONARY 16X9.** The industry’s first 16x9 aspect ratio touch panel, the 17” Modero Widescreen offers an ultra-wide user interface that comfortably displays multiple 4x3 images—such as those featured on the 12” and 15” Modero Touch Panels—while navigating other on-screen control functions simultaneously. There’s more than enough room to effectively manage business operations or monitor home systems from a single touch panel page.

**ALL-INCLUSIVE.** The multitude of electronics found in today’s businesses and homes require miles of cable to connect. That’s where the 17” Modero Widescreen provides smart, single points of control. Its “all-inclusive” interface saves valuable time, especially when you need to have instant access to a large number of integrated devices. No matter how many are present in a commercial or residential setting, the 17” Modero Widescreen displays everything needed to take control with ease.

**SIMPLIFIED DISPLAY.** Video, Internet access, camera windows and control icons can be positioned as desired, anywhere on screen. Navigate individual buttons or activate multiple functions simultaneously. In fact, the 17” Modero Widescreen comes with so much user interface real estate that you can program dedicated controls—such as lights, volume and sound levels—to appear on every touch panel page. When you need to see everything throughout the office or your home at once, having the right controls available at all times makes sense.

THE CONTROLLING FORCE. Modero—“the controlling force”—is the most capable, feature-intensive touch panel series on the market, enjoying enormous success in commercial and residential applications worldwide. The award-winning 15” Modero sets a benchmark by which all other user interfaces are judged. As a Table Top or Wall/Flush Mount version, the 15” Modero delivers simplicity, convenience and luxury.

SIZEABLE INTERFACE. In corporate and home environments where networked systems and a large number of connected devices require powerful integration and control, the 15” Modero handles any job with ease. The panel’s sizeable user interface allows you to automate your environment seamlessly and with minimal effort. Quickly see everything you need to accomplish, from setting up a presentation at work to monitoring different areas throughout your home.

AESTHETIC APPEAL. The 15” Modero panel’s sleek design makes an attractive, seamless addition to both corporate and residential settings. Fine furniture and other well appointed furnishings demand luxury and the 15” Modero enhances the elegance of your office or home.

CONVENIENCE & LUXURY. Combine innovative multimedia functionality and a sleek design to complement any room, in any situation. A conference area may suggest that the 15” Modero go front and center, where it can be smoothly operated during meetings. The presenter can do several things at the same time, like navigate presentation slides and coordinate calls to remote office locations. At home, where the kitchen attracts the most traffic, you may consider having it on the counter space. As you enter, the 15” Modero’s high resolution video greets you with your favorite TV show and will instantly show where a visitor approaches the front door. That’s convenience and luxury all rolled into one.

EXCEPTIONAL VALUE. The 12” Modero delivers just the right amount of control for smaller office spaces and homes. All the features you expect from our award-winning Modero series are included, making the 12” Touch Panel a wise selection for maximum control of a specific number of electronic devices.

ECONOMICAL SPACE. Often the space allowed for a touch panel will determine the size you need. The 12” Modero provides flexibility and greater choice. Feel free to place the panel on your office desk or the conference room table. Position it on the kitchen counter or the bedroom end table. The 12” Modero fits in nicely at work and at home, offering powerful control capabilities.

FIRST IMPRESSIONS. The 12” Modero not only looks cutting edge, it plays the part as an attractive addition to any corporate or residential setting. Its seamless nature lets you take control effortlessly and in style. Its unobtrusive characteristics allow you to operate integrated devices while keeping eye contact with co-workers, family and friends. No more leaning over and around the panel's display to hold a conversation. The 12” Modero makes a strong first impression that will last.

MULTIMEDIA READY. Bring multimedia functionality into your lifestyle, at work and at home. The optional multimedia-ready 12” Modero provides a user-friendly format for integrating and automating audio, video, security cameras and on-screen dynamic images. The user interface reveals crisp, clear pictures and sound, plus colorful, state-of-the-art graphics. Through seamless and responsive AV source integration, you’ll be able to accomplish more things in less time and enjoy doing it.

From boardrooms to home theaters, you’ll find these areas of control demand more than ever an affordable, mid-size touch panel with substantial on-screen real estate to easily accommodate graphics, icons and video windows on a single user interface. Your solution is simple: The 10” Modero Touch Panel – all the enduring design principals and powerful control functionality inherent in AMX’s Modero family engineered into a panel sure to stand the test of time.

In places where space is critical, the 10” Modero presents an unobtrusive overall form factor, combining the smaller base on the 7” Modero Widescreen with an expansive 16x9 aspect ratio user interface for maximum visibility and one-touch control options. When the situation calls for a smart investment in control technology, from businesses to residences, the 10” Modero makes an intelligent – if not, obvious – selection.

AMX offers you the largest selection of widescreen touch panels from which to choose on the market. Indeed, no other company can make such a claim. Our impressive line-up of Modero Widescreens includes the 7”, 10” and 17”. Small, medium and large-scale solutions perfect for any integrated environment, so you can experience the greatest amount of control possible for your application.

When the situation calls for a smart investment in control technology, from businesses to residences, the 10” Modero makes an intelligent – if not, obvious – selection.

WIDEST SELECTION.
AMX offers you the largest selection of widescreen touch panels from which to choose on the market. Indeed, no other company can make such a claim. Our impressive line-up of Modero Widescreens includes the 7”, 10” and 17”. Small, medium and large-scale solutions perfect for any integrated environment, so you can experience the greatest amount of control possible for your application.

TABLE / WALL FEATURES.
10” Modero Table Top and Wall/Flush Mount versions are available with optional external pushbuttons and wireless capability. The external pushbuttons located on the panel’s bezel deliver easy and fast navigation. Use the pushbuttons to quickly access and locate the control functions you use most often – lights, climate controls, security and others. Convert the Table Top version to a wireless control solution by using the standard 802.11b Wi-Fi Card. This setup eliminates unsightly cables to create an aesthetically pleasing setting in conference rooms, offices and other meeting areas, as well as throughout the home.

PERFECT VISION.
What you see is what you get with the 10” Modero, which has an innovative photosensitive light detector located on the front of the panel. There’s no need to reposition the user interface in order to reduce glare or shadows. Keep it where it sits because the 10” Modero panel’s light detector is smart enough to assess surrounding degrees of light and will automatically regulate the brightness of the display. What a nice blend of convenience and luxury you’ll enjoy in the office and at home.

In High Demand. The overwhelming popularity of the 7” Modero Widescreen reflects this panel’s intelligent and innovative combination of a widescreen user interface, multimedia capabilities and competitive pricing. When the situation demands extra on-screen real estate but within the dimensions of a smaller touch panel, the 7” Modero Widescreen remains unmatched in overall value.

Expanded Possibilities. As one of the industry’s first 16:9 aspect ratio Touch Panels to hit the market places, the 7” Modero Widescreen expands the realm of control possibilities—literally. The ultra-wide user interface allows you to navigate on-screen functions, watch a video window and control audio/video equipment all at once. Use one side of the user interface to preview video or track surveillance cameras. Use the other side to activate buttons, graphics, icons and animation.

Ambidextrous Control. The 7” Modero Widescreen displays a real size video image with incredible resolution. Plus you can actually reposition the video window, a moveable pop-up, anywhere you desire. Whether you’re left-handed or right-handed, simply drag the video window where it feels most comfortable. The touch panel works around your needs, making your work and life convenient and responsive. No two ways about it.

Hot Buttons. Optional external pushbuttons, available exclusively on the Wall/Flush Mount version, deliver easy and fast navigation. Now you can directly access the control functions you use most often—lights, climate control, security, and others. When you’re facilitating a meeting or perhaps checking security camera points throughout your home, the pre-programmed pushbuttons take you straight to the touch panel pages you need instantly.

Twice the Bezels. Included with the 7” Modero Widescreen are two bezels—one with and one without external pushbuttons for Wall/Flush Mount control. You have the option to choose the bezel you would like, depending on what suits your needs and desires.

MORE BANG FOR THE BUCK. With these two compact designs, the 6” and 4” Touch Panels deliver a maximum amount of control, at economical prices, in minimal spaces.

6”– ELEGANT & SIMPLE. The wide appeal of the 6” Touch Panel reflects its simple, no-nonsense yet elegant and sleek exterior that blends inconspicuously into your surroundings. You can’t help but appreciate its intelligent, intuitive design. The 6” is also available with the optional Table Top Enclosure. The Enclosure comes as a metal casing available in unfinished aluminum for custom paint applications.

FEATURE INTENSIVE 6”. The 6” Touch Panel comes with user-friendly features included with both the Table Top and Wall/Flush Mount versions including:

• Bright 6” Active-matrix LCD
• Adjustable Video Windows
• Compact Design

4”– JUST RIGHT. The 4” Touch Panel boasts numerous innovations including a microphone, speakers, IR receiver, opaque buttons, and light and motion sensors. This touch panel blends nicely with any interior and provides the right amount of control and automation.

ON THE BUTTONS. Six programmable external buttons are positioned conveniently to the right side of the display. Each touch panel includes a button kit containing 16 total buttons - ten pre-printed with symbols/icons representing popular functions/devices including Menu, Lights, Audio, Video, Climate, Entertain, Security, Weather, Sprinkler, Up and Down, and others; six blank, and two embossed with up-and-down arrows for selecting menus or adjusting volumes.

MICROPHONE AND SPEAKERS DO IT EASY. The microphone and speakers allow you to utilize 2-way intercom communications, play WAV files and listen to MP3 music. An IR Receiver allows communication with other AMX Touch Panels or the AMX IR Remote.

FEATURE INTENSIVE 4”. This 4” Touch Panel comes with several user-friendly features including:

• Speakers and Microphone
• Six Interchangeable External Buttons with LED’s for feedback
• Light and Motion Sensors
• IR Sensor
• Optional Water-resistant Bezel
